

ENVIRONMENTAL PROTECTION HEALTH AND SAFETY MANAGEMENT POLICY IN THE WORKPLACE

Ansaldo Nucleare S.p.A considers respect for the environment and its employee's health and safety as fundamental principles to adhere to while implementing any work-related activities, in accordance with its Organizational Management and Ethics Code. In order to achieve such principles, the Chief Executive Officer of Ansaldo Nucleare S.p.A. is committed to:

- complying with all relevant regulations and standards related to Environment Health and Safety
- implementing an Environmental Health and Safety Management System according to ISO 14001: 2004 and BS OHSAS 18001:2007
- preventing pollution
- preventing risks and accidents in the workplace ensuring the compliance of "on-site" and "in-site" contractors and subcontractors with the same environmental, health and safety standards adopted by Ansaldo Nucleare
- establishing and updating environmental health and safety improvement objectives
- giving importance to the territorial and social aspects in which Company operates
- constantly improving the Company's performance in environmental care as well as employee health and safety working conditions, with particular reference to the activities detailed in the following:
 1. Development of research applications in protection against the ionizing radiations, and adopting the best technologies and design methods related to the protection of population and workers during the phases of plant erection, construction, operation management and decommissioning
 2. Encouraging personnel to reduce paper copies by selecting double-sided printing options
 3. Promotion of sustainable transport
 4. Monitoring the recycling of paper, plastic, glass, organic waste on the Company premises
 5. Monitoring production, storage and disposal of hazardous and special waste
 6. Starting from the definition of the site layout, equipment and tools, the adoption of best-practice methods for (i) the prevention of accidents which may impact on the personnel and the environment and (ii) for the reduction of accident impact in case of occurrence.

In additional to the above, Ansaldo Nucleare S.p.A. is engaged in:

- making available a copy of this policy to all personnel working for the Company or on its behalf, and ensure its full comprehension and implementation by all categories,
- making available a copy of this policy on the Company intranet and internet,
- sending a copy of this policy to all external parties upon request.

Genoa, November 2th, 2015

Chief Executive Officer
Roberto Adinolfi
