

## PRESS RELEASE

---

Genoa, 19 March 2020

### **Ansaldo Energia: sanitization works completed**

Ansaldo Energia has completed all further sanitization works at the plant, in full compliance with the Protocol between the Government, Confindustria and the Social Partners of March 14, u.s.

Although the conditions exist to resume production activities, the Company, with a sense of responsibility towards its workers and the Country, in a time of great difficulty, has decided to extend the closure for a further week, restarting production Monday 30 March, thus helping to reduce the number of people circulating.

The Company will guarantee its operational continuity through targeted Smart Working activities and specific Service activities on power plants, to ensure full plants' operation, with the aim of not compromising the safety and quality standards of the national electricity service, which is even more important in the emergency situation the Country is going through.

The Company, aware of the ability and flexibility of its workers, once the emergency is over, will resume full activity thus ensuring compliance with the contractually scheduled deliveries.

Finally, Ansaldo Energia warmly thanks all the personnel who in these days, with dedication and a sense of responsibility, have worked in the factory for the preparatory works for full production recovery in safety.

---

Ansaldo Energia Group is a leading international player in the power generation industry, to which it brings an integrated model embracing turnkey plants, components (gas turbines, steam turbines, generators and microturbines), servicing and work in the nuclear energy sector. Ansaldo Energia is 59,9% owned by CDP Equity in the Cassa Depositi e Prestiti Group, an Italian state-owned entity which has been promoting the country's economy since 1850, and 40% by Shanghai Electric, the world-leading producer of power generation machinery and mechanical equipment.
