## PRESS RELEASE

### ***ANSALDO ENERGIA: NEW PARTNERSHIP WITH ELETTRA CAR SHARING AND DUFERCO MOBILITY***

As part of the initiatives in favor of increasingly sustainable mobility, the Ansaldo Energia Group has entered a new partnership with Duferco Mobility and Elettra Car Sharing.

The agreement provides for the introduction in Ansaldo of corporate mobility services provided by Elettra Car Sharing, with the consequent entry into the company fleet of two Elettra full-electric cars. The cars will allow travel within the company area and city trips to be carried out in a totally carbon-free way.

A growing attention by Ansaldo Energia towards increasingly green mobility which could further develop into new urban mobility options.

Furthermore, with a view to making the home-work journey increasingly sustainable and providing new green mobility opportunities to all its employees, Ansaldo Energia has equipped itself with six new Duferco Mobility charging points that can be used via the D-Mobility application, through which they will be able to access charging services even outside the company area.

The charging stations installed within the company area will allow employees to benefit from a discounted rate with a significant saving compared to the standard one.

The Ansaldo Energia Group, international leader in the field of electricity generation and key player of the energy transition, is a company controlled by CDP Equity (Cassa Depositi e Prestiti Group).

Elettra Car Sharing is the 100% electric car sharing service launched in Genoa by Duferco Energia, among the leading energy and gas suppliers at national level and always involved in projects linked to sustainability, electric mobility and energy transition. Today Elettra manages 155 full-electric cars, available to Genoese citizens both in the "station based" rental mode, i.e. with fixed parking, and in "free floating", i.e., with free release within an operational area of the Municipality of Genoa. Furthermore, an increasing number of companies are choosing Elettra to manage their corporate fleet and guarantee zero-emission travel for all employees. The service has over 10,000 subscribers and, since it started (July 2021), Elettra cars have traveled more than 2.8 million km, with a positive impact on reducing emissions equal to over 300 tonnes of CO<sub>2</sub>.

Duferco Mobility Srl is the company 100% controlled by Duferco Energia, which deals with green mobility. Today, with a network enabled for its charging services of over 25,000 charging points in Italy and over 200,000 in Europe, it is among the main companies involved in the transition from traditional to zero-emission mobility.
